

## *CORRIGENDUM – 04.12.2024*

In the *Swiss Antibiotic Resistance Report 2024* (published 18 November 2024), **an error was identified in the y-axis labelling of Figure 11. a, p. 180.**

The unit provided for concentration of antibiotics in the wastewater influent to WWTPs (-In), effluent of conventional WWTPs (-Out), effluent of WWTPs equipped to abate micropollutants (-Out MP) and surface water (SW) was incorrectly stated as "mg/L." **The correct unit is "µg/L."**

This error appeared only in the version of the document available for download between 18 November 2024 and 4 December 2024. **The document has since been corrected, and the updated version is now available for download.**

This correction does not affect the data presented in the figure or the conclusions of the report. We apologize for any inconvenience this may have caused and appreciate your understanding.
